

Case Management for Seniors, the Disabled, and Their Families

There comes a time when life feels chaotic. In many cases, we have found that the peak of this chaos is at the time of an illness of a loved one.

Senior Medi-Benefits is an organization of consultants and non-medical case managers.

Each and every one of us believes in solving problems for our clients in the most intelligent and efficient ways possible.

We have clients who required assistance with specific situations like medical bills. Others faced difficulties activating long-term-care insurance policies. While others needed to stretch their finances in order to remain home for as long as possible.

Many of our clients are adult children who are the Successor Trustees for their parents; they are beginning to face their parents' oncoming incapacities and need guidance through options for getting their parents the best possible care.

We assist with evaluating non-medical care needs, educating on types of care available, optimizing medical or other insurance policies, evaluating funding options, and guiding families through a wide variety of other decisions that must be made.

In some cases, Senior Medi-Benefits locates grants or government sources. In other cases, Senior Medi-Benefits re-negotiates expenses and sets families on a new path. Interestingly, many families have us involved before it gets overwhelming. This pre-planning can make a huge difference before an emotional trauma or health emergency creates chaos.

Senior Medi-Benefits connects all of the loose pieces for families so that an entire plan comes together and runs smoothly.

Where do you start?

Call 1-888-789-4589 today for a free consultation or email us at Information@SeniorMedi-Benefits.org.

Senior Medi-Benefits is a 501 (c) (3) non-profit organization dedicated to helping seniors and the disabled to manage their lifestyles and care needs.
